

# Irresistable Upgrades

## LED Chroma-Therapy

Using our multifunction LED lighting technology, which provides 100,000 hours of light per LED, Spa Crest Hot Tubs produce a beautiful spectrum of color options, and allow you to choose how you want your colors to shine. Using your hot tub's topside control, you can easily select from options which include:

- Cycling through all of the colors slowly or selecting your favorite color for continuous mood lighting
- Enjoying the soothing, "Slow Fade" option, for example fading from blue to green
- Entertaining a crowd with the "Party Mode" which produces rapidly changing colors for added fun

Endless options for endless enjoyment – that's Spa Crest Hot Tubs.

## In-Home Remote

The Spa Monitor In-Home Remote control allows you to control your spa from the comfort of your own home. Utilizing radio frequency this optional remote will work through walls and other obstacles up to 80 ft/25 meters from the spa. This remote allows you to raise and lower the spa temperature, turn jets on and off, control the lights and many other features.

*\* Only available on Vision Models, standard on European Vision models.*

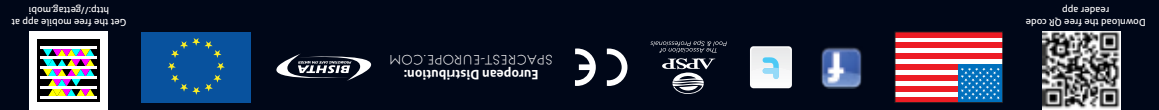

## Audio System

Only we could offer this truly, unmatched sound experience. Available as an upgrade on all models, you'll be amazed at the sound this marine-grade stereo produces. We offer different audio options for all price levels taking your Hot Tub to a whole new level. Ask your dealer for the latest audio offerings.

*(Not available on model 301).*

# Credibility. Reliability.

To be credible means that others not only trust you; they also believe in you. In addition to building the highest quality hot tubs since 1985, we at Spa Crest Hot Tub Manufacturing have also been building a superior reputation so that you can have full confidence in our entire product line.

To be reliable means the desired result will be consistently achieved without fail. Thanks to our team of expert

designers and engineers, all Spa Crest, Coastal and Vision Hot Tubs exceed the highest of standards so that you're assured the utmost reliability for your investment.

Ask our customers and they will likely say they think more about exceeding comforts than credibility and reliability. To us, that just means we're doing our job and will continue to dedicate our expertise to earn your trust and loyalty.

The less our customers think about credibility and reliability, the more we know we've exceeded both.

An exceptional product line at an exceptional value, that's Spa Crest Hot Tubs. You will be surrounded by the comfort of warm soothing waters for a renewing experience inside and out.

Spa Crest models are available in multiple equipment configurations. Ask your dealer for the specification that best fits your needs.
